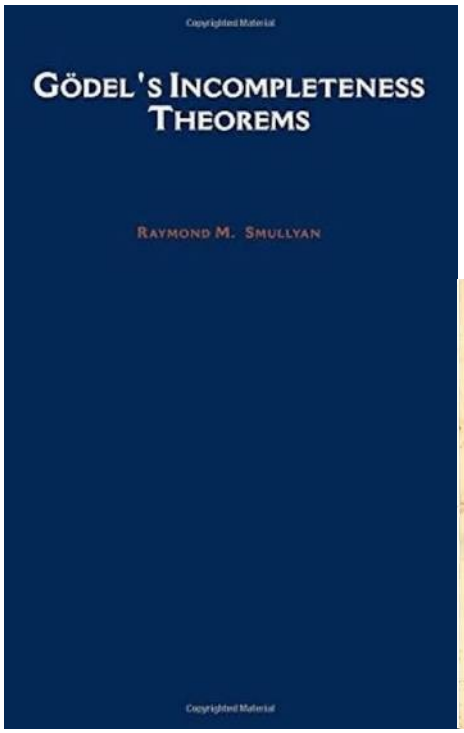
Further Mathematics



By Shomit Sirohi

I. A List of Werks so Far

A. Being and Existence – On Temporality and Complex Arcs and Sub-Temporalities and History and Circumferances
B. Being and Appearance – On Abstract Ontology and Concrete Phenomenology of in fact Mathematics Mainly, but with the Jewish Aramaik.
C. Further Mathematics – The Union of the Two but as in fact Mathematics Independently.

II. Produce an Argument – Hegel’s Spirit, Heidegger’s Acting and Acting it out in Sirohi or Lectur Forcing.

I mean the production of arguments. Literature calls this developing a process on the works to produce an argument.

III. A Movement

A. German Idealism and Simplicities in Heidegger’s Arcane German Idealism
B. Many Arguments in the Meaning of German Idealism in this New Version.
C. Spanish Language Arguments

IV. Finally – A Poem and a Mathematical Point

I was first a temporality,

Of History and Phenomenology,

I was born from an Analysis,

I became about Mathematics and the Aleph and Alif Series,

And Now I am in fact about Sex and Women,

At another level about concrete things,

Materialist things,

A Werk Itself.

Imagine that,

A Werk that argues,

A Werk.

An empty page,

And a photograph,

To be a Volumnus on then.
